

# Optimize and Secure Your Okta Environment with Teraworks Health Check

Teraworks Okta Health Check is designed to ensure that your Okta environment is optimized with industry best practices and robust security configurations to safeguard your data.

Our certified Okta experts will conduct a thorough review of your Okta tenant to uncover potential issues, vulnerabilities, and underused features. You will receive a comprehensive report with actionable insights and tailored recommendations to enhance the effectiveness and security of your Okta setup.

## Why an Okta Health Check is Essential:

Okta regularly releases updates, new services, and features, making it difficult to stay on top of the latest innovations and industry standards.

Over time, your IT or security team may add additional configurations and integrations to your Okta environment, which may need periodic review and adjustments.

An Okta health check provides the ideal opportunity to assess your platform's performance, security, and alignment with best practices—ideally on an annual basis.

## What Teraworks Okta Health Check Includes:

- 1. Discovery and Assessment:** Our expert consultants will work closely with your team to gather insights and fully understand your current Okta environment.
  - Okta Tenant Configuration & Settings
  - Security Settings and Policies
